

Vacuum Recovery/Floor Cleaning System

Part# VAC-REC

Vacuum recovery system with automatic pump out

Part# ASE-0120

Floor cleaner with vacuum connection

Features:

- 110 volt, 250 CFM, dual vacuum motors
- 110 volt automatic pump out system
- Floor cleaner with vacuum recovery

Benefits:

- Connects to Hydroblaster and other pressure washers
- Super quiet operation (56 DB)
- Vacuum recovery & auto pump out simultaneously

How it works

The floor cleaning tool and vacuum recovery with auto pump out unit is attached to a Hydroblaster pressure washer. Preferably something that is rated 5 GPM and 3000 PSI, and hot water. As you begin the wash process, the vacuum system automatically collects the water. As the water fills the 23 gallon vacuum tank, a level control automatically begins to pump the collected water to the drain, or to a collection point for filtration and disposal. There is never any interruption of cleaning because the system has been engineered to clean and pump out at the same time.
